

Feed Quality Conveying Test

- Iowa swine farm.
- Two inch (50.8 mm) Cablevey conveyor diameter.
- Eight Hundred feet (243.8 meter) conveyed length.
- Mash feed.
- Six feed samples - three taken at start and three at end, as Cablevey feeder was running and filling up feed dumps along the swine barn.
- Assays conducted by Midwest Laboratories, Omaha, Nebraska.

Summary:

Feed nutritional value as determined by five ration chemical assays, indicated no losses occurred during conveying of mash swine feed in a commercial farm facility with Cablevey.

Item (Dry Basis) (%) <i>mean</i>	Start	End 800 ft. (243.8 m)
